

Recipe sharing app

Luka Tuononen,
Joonas Saksanen,
Aliisa Rokala

Project goals

We want to make a platform where users can easily share, save and review each others recipes. It is targeted towards anyone who's capable of cooking; from people who are passionate about the culinary arts to people who are looking for simple and easy meal ideas.

User stories:

As a user I want to...

Create a new
recipe entry

Search for
recipes

View details of a
recipe

Save my favorite
recipes

Share my recipes
with others

Like and
comment on
recipes

Edit or delete my
recipes

Follow other
users

Product backlog

1

Create and Edit Recipes:

- Detailed: Clearly define the fields required for recipe creation and editing (name, ingredients, steps, time, difficulty, image).
- Emergent: Allow flexibility for users to add additional details based on feedback.
- Estimated: Break down tasks for front-end development, back-end development, and UI/UX design.
- Prioritized: High priority as the core functionality of the app.

2

Search and Filters:

- Detailed: Specify the criteria for search and the types of filters to be implemented.
- Emergent: Adjust filters based on user feedback and usage analytics.
- Estimated: Break down tasks for implementing search algorithms, filter UI, and backend integration.
- Prioritized: High priority for user navigation.

3

Save and Favorites:

- Detailed: Define the process of saving and accessing favorite recipes.
- Emergent: Explore options for creating custom lists in the future.
- Estimated: Break down tasks for frontend development, backend integration, and list management.
- Prioritized: High priority for user retention.
